Annual Per Capital Disposal

Employees

Total Number of Employees: 1456

Explain who was included in this number and how was this employee number calculated.

Included in this total number are Caltrans employees within the building and off-sites. The number of employees was provided by several sources, our Maintenance Department, Administration Department and Construction Department. All departments have clarified the number of employees in the building and their off-sites. We do have other agencies in the building as well as visitors. The other agencies are not factored into the reporting, they do their own reporting. Additional employees included are employees at off-site facilities.

Non-Employee Population

Total number of non-employee population: 500

Population Type: Visitors

How was this population number determined?

Visitors are included in this number. The number was calculated by our visitor log.

Disposal

Total amount disposed: 37,242.79 tons

Total transformation: 0.00

How was this disposal number determined?

In Construction, refuse that was diverted or transformed was concrete and asphalt. This is crushed up and is recycled back into the materials used in projects on the roads and highways. Plastic, paper, glass and other recycled materials picked up by the refuse companies, are recycled by the materials accordingly. Anything that cannot be recycled is then taken to the land fields. Refuse picked up from the homeless is usually not recycled due to contamination or hazardous materials. This can't be transformed

Annual Results

	<u>Employee Population</u>		<u>Non-Employee Population</u>	
	<u>Target</u>	<u>Annual</u>	<u>Target</u>	<u>Annual</u>
Per capita Disposal Rate (pounds/person/day):	361.60	140.16	1,325.90	408.14
Per Capita Transformation Rate:	72.30	0.00		
Calculated Disposal Rate (pounds/person/Day):	--	140.16		

Questions

What types of waste are still thrown away (not reused, recycled, or composted)?

C&D waste and mixed debris included concrete, asphalt and mixed vegetation. Even though much of these materials are being diverted from the landfills; the process to capture this information for all the projects has been developed and monitored. Although most of the materials were diverted, the amounts in report and materials that could not be recycled, therefore are taken to the land fields. The waste from the state agencies which is picked up by a refuse company is added into the waste thrown away. Most of the materials are also recycled by the refuse company, thus leaving a small amount that goes directly to the land field. Also added into the report is amounts of waste taken to the land fields from the effort to clean up our homeless sites. These sights are on the right of ways our freeways and highways. The waste cannot be recycled due to contamination.

What difficulties or obstacles have you had with finding ways to recycle, reuse or compost these types of wastes?

There are no difficulties or obstacles with Constructions' and Maintenance reporting's. Materials being disposed from our construction and maintenance project are being monitored. Implementation and awareness of recycling efforts from Construction and Maintenance has made recycling more successful

Programs

Recycling

- Beverage containers
- Glass
- Plastics (#3-7)
- Cardboard
- Office paper (white)
- Office paper (mixed)
